NATURAL INSECT CONTROL - 3 SOLUTIONS - 1 PRODUCT

1. Flea & tick control on pets
2. Indoor flea & tick control
3. Personal insect protection - Mosquito & tick protection

Cedarcide Original R-T-U Pest Management Formula is designed for professionals & consumers to kill & repel crawling, flying Insects, eggs, larvae & nymphs.

Recommended Indoor Use:

Treat for bed bugs, fleas, ticks, silverfish, ants, roaches, scorpions, stink bugs and other insects.

Indoor Facility Types: Indoor spraying of homes, nursing facilities, public housing, manufacturing facilities, Military installations, manufacturing plants, poultry facilities, industrial buildings, kennels, warehouses, zoos, and more

Important Note: Cedarcide Original Indoor Formula should not be used outdoors for insect control. This product will give plant life phytotoxic shock.

For outdoor insect control see PCO formulation, a concentrated cedar oil formula tested and proven to work on various outdoor insects without harm to plantlife.

Precautionary Statement: DO NOT SPRAY AROUND OPEN FLAMES (PILOT LIGHTS OR STOVES) DO NOT GET ON PLANT LIFE... DO NOT DILUTE/THIS IS A READY TO USE FORMULA (Treats 1300 sq. ft.)

Recommended Equipment: Power Sprayers, Backpack, foggers and hand held Pump Sprayers.

First Application - Apply twice in a 7 to 10-day period to establish control of the egg laying cycle. Then spray once every 30 -45 days.

USER SAFETY RECOMMENDATIONS:

CAUTION: KEEP OUT OF REACH OF CHILDREN. Avoid Contact with eyes. When applying use protective eye wear and gloves. In case of eye contact, flush with water for 15 minutes. Do not take internally. After use, wash hands with soap and water.

IMPORTANT NOTE: NEVER SPRAY AROUND OPEN FLAMES OR DIRECTLY IN FACE OF HUMANS OR ANIMALS.

PERSONAL PROTECTIVE GEAR / EQUIPMENT:

- Protective eyewear
- gloves

Compatibility – **Cedarcide Original R-T-U Formula** is compatible with most pesticides

STORAGE: Store in dry area. Avoid prolonged exposure to direct sunlight. Tightly reseal after opening to preserve shelf life.

IPM: Best results are achieved when used as part of a protocol that includes environmental and other pest control measures.

How this Product Works: The aroma of cedar oil is lethal to NON-BENEFICIAL insects which are driven by pheromone (odor) and heat stimuli. Cedar oil stifles the ability of the insect's receptors to detect food, mates, and disrupts its reproduction habitats. When comfort levels are destroyed, insects become overwhelmed and relocate to areas of concentration where sight driven predators such as birds, lizards, and beneficial insects will control infestations. Insect displacement interrupts the "egg laying cycle" eliminating a new generation of arthropod. Unlike synthetic chemical pesticides, **Cedarcide Original Formula** does not neutralize insects by poisoning. But acts in one or a combination of the following ways to kill them:

1. Osmotic Dehydration: **Cedarcide Original Formula** leaches the insects and eggs of moisture and dehydrates them.
2. Prevention of Breathing: By irritating the respiratory system of the insects, especially those with high olfactory. **Cedarcide Original Formula** forces insects to avoid breathing, shutting down to avoid the extremely powerful irritants.
3. Pheromone Interference: Interrupts and attacks the octopamine neuro-receptors, crucial for neurotransmitter's regulation of metabolism, movement, feeding, reproduction and behavior.
4. Dissolving Insect Eggs, Larvae, Pupae, and Eroding the Exoskeleton and Cuticle of Adult Insects, thus exposing the inner delicate parts of the insects for their demise. This demise which **disrupts the Egg-layer cycles** helps control the next generation of insects.

1) Indoor flea protection

Prior to spraying anything you need to vacuum everything very well including floors, couches & Chairs "sides, backs, fronts, tops and all sides of cushions, vacuum both sides of mattress, box spring including sides. Empty out container or throw away vacuum bag ASAP

Follow directions in section "A" above, plus treat your flooring (carpet) under and around wood furniture, bedding areas, sofa and chairs. Flip up furniture and spray underneath. Cedar oil does not stain anything.

May require a second treatment

Do not vacuum carpet for a minimum 24 hours. This product once applied will lie on the eggs and dehydrate the exoskeleton of the eggs. We do not want to disrupt this process by vacuuming any surface that has been treated. Once you have waited the minimum time frame you can then vacuum. However, you can wipe down surfaces counter tops, furniture. **Recommended once every 30 to 45 days...**

2) Alternative Pet Care

For most pet owners, the family dog or cat is a beloved member of the family. Unfortunately, products often used to protect pets from fleas and ticks carry serious health hazards -- not just for the pets, but for the children who play with them, care for them, and love them. Cedarcide Original neutralizes or repels fleas, ticks, lice and mites; those parasites that continually plague our domestic mammals, dogs and cats.

DIRECTIONS – Fleas & Ticks: This solution is a ready to use formula for pets and other animals. Apply a **mist** so the insect breathes in the mist. This response triggers closure to the breathing pores. Use as a repellent as often as necessary by spraying a liberal amount starting at feet, legs, pits, groin, belly, neck, tail and rectum area. Spray a liberal amount in the palm of your hands and gently rub around the facial area. Repels for approx. 4 hours

Ear Cleaning: Spray cotton ball and clean out ears as often as needed.

Hot spots, mange, mange mites and other skin issues: Treat the area of concern 3 times per day until you see the results you desire. Cedarcide Original promotes healing of **flea dermatitis and dry flaky skin.**

When to Use:

Use at first signs of insects or when going out doors for walks or to the park. You want to thoroughly check for any insects when returning from walks to make sure you did not pick up hitch hikers. If an insect is present, simply spray. For application on cats please spray in hands then massage into hair and skin. Do not get in animal's eyes.

FIRST TIME USERS FOR CAT'S:

IT IS HIGHLY RECOMENDED THAT YOU APPLY A SMALL AMOUNT ON YOUR CAT TO SEE HOW THEY REACT TO THE SOLUTION. SOME CATS MAY LICK OFF ALL THE SOLUTION AND GET A STOMACH ACHE. SHOULD THIS HAPPEN GIVE YOUR CAT LOTS OF WATER! IT IS UP TO EACH INDIVIDUAL CAT OWNER ON WHETHER THEY WANT TO USE OUR PRODUCTS OR NOT. IT IS AN OIL AND SOME CATS DO NOT TOLERATE THEM AT ALL.

3) Personal Insect Control

Spray exposed areas of skin with a light spray to control mosquitoes, no see-ums, chiggers and ticks. Repels for approx. 3 hours.

NOTE: Hunters should spray exposed areas of skin & clothing to mask the human scent. For facial area spray in hands and wipe on and around face...Keeping out of eyes and mouth.

Active Ingredients

Cedarwood Oil.....	10%	25b active
Hydrated Silica.....	90%	4a inactive
TOTAL:.....	100%
