## Dr. Ben's Paws and Claws Flea, Tick and Mite Spray Formula

**Attention Cat Owners: For 1st time application on your cat spot test or use sparingly and check for possible objection to the presence of cedar oil. Cats will often attempt to groom themselves and in the process ingest the formula by licking excessively. Occasionally cat owners may observe their pet develop an upset stomach in this process and they may regurgitate a white foamy substance. If this occurs be prepared to rinse the formula from applied areas and discontinue use.**

Dr. Ben's Paws and Claws helps keep dogs and cats insect and toxin free with this all natural cedar oil formula. It is a topical spray treatment that does not enter your pet's system in order to be effective. Apply directly to your pet as an insect control agent and skin rejuvenator. This formula excels at flea, tick, mite and ear mite control. Helps eliminate mange, mange mites and more.

Enhances the healing process for damaged skin often associated with these conditions. Dr. Ben's cedar oil formula is a natural insect neutralizer. Insects cannot tolerate the effects of this cedar oil mixture. They will immediately leave all areas treated as cedar is naturally intrusive to their bodily functions.

Recommended by prudent Vet's, Holistic Vet's, Pet Groomers, Top Breeders, Animal Shelters, Kennels and Pet Owners as a natural alternative to chemically based flea and tick products. Dr. Ben's formula also offers protection from flies, mites, mosquitos, lice and more. Healing of yeast and bacterial infections of the ear canal can also be effectively enhanced using this cedar oil solution. This cedar oil formula also de-hydrates and neutralizes insect eggs and larvae.

## Directions:

Dr. Ben's ready to use formula has been created for dogs, cats and other animals. This solution will neutralize pheromone driven insects on contact. Apply spray directly to your pet or on any flea or tick when seen. Periodically apply spray for prevention as the formula is as an extremely effective insect repellent. Use as often as necessary before going for a walk, going in the yard, or around the house. Spray as desired/needed directly on your pet including paws, legs, pits, groin, belly, neck, tail and rectum area. For facial application, spray product on hands and rub onto the area avoiding contact with your pets eyes.

Can also be applied to bedding areas, inside dog houses, etc. Paws and Claws is a natural anti microbial and promotes healing of flea dermatitis and dry flaky skin. Great for treating hot spots, mange, burrowing mange mites, ear mites and other parasitic related ailments. Promotes healing of associated skin issues related to pest infestations on animals.

For existing problem cases, repeat applications 3 times daily will stimulate hair growth and help heal damaged skin. An application into the ear canal will destroy ear mites and chronic fungal organism issues. Use at first signs of insects or when going out for walks or to the park. For added insurance against unwelcome insects, you may wish to visually check your pet upon returning home to insure that unwanted pests aren't introduced into your immediate environment from an outside source. Spot apply if needed before entering premises.
